GUEST-10421

SIMULATED HANDOFF PLAN (sample reference – not a gate credential)

Sample ref: GUEST-10421

Title: Simulated handoff plan – claim Amazon parcel at front door (sample ref)

Status: draft

Approval: confirmed

Recipient: Thabo (neighbour)

Action: notify_handoff

Timing: Neighbour leave-with 18:00–18:30 SAST

Timezone: Africa/Johannesburg (SAST, UTC+2)

Observations:

- motion: true
- parcelVisual: true
- summary: ring motion at front door · parcel-shaped cardboard
- eta: 16:00–18:00 SAST
- carrier: AMZL
- summary: AMZL stop nearby / expected delivery window
- summary: ACK session sess-mtnlu7lr
- summary: Secure handoff window today 18:20–18:45

SAST

- AMZL stop nearby / expected delivery window

Assumptions:

- Neighbour usually available after 19:00 is stale – using leave-with window 18:00–18:30
- Thabo is pre-authorized for gate/guest handoff in household context

Primary: Courier at the stoop with a sealed Amazon box @ 2026-09-04 17:42 SAST

Secondary: Same-day AMZL – Echo Dot Kids for Lebo @ 2026-09-04 14:05 SAST

Opened by Ops Concierge (Alexa+ simulation) session sess-mtnlu7lr

Household: Tshiamo Komane – Africa/Johannesburg

Note: Sample reference only – not an unlock / door credential
